PROFESSIONAL DESCRIPTION

RED 10A digital single-phase regulator:

The RCS series regulators, suitable for driving fans with single-phase asynchronous motors, use special technical features to guarantee the best performance in regulation without compromising the optimal operation of the motor. For the driving phase, they use an 8-bit microprocessor that constantly follows the sinusoid with maximum precision, guaranteeing perfect switching of the triac and therefore optimal operation of the motor. Filtered according to current CE regulations, the regulators of this series are the most requested on the market.
