- 2+2 meter PVC pipe, stainless steel bottom filter and 90° PP tank connection

FEATURES :

- The IPCR6/DET/4 pump, specific for the catering and hospitality sector, can be used in various applications related to cleaning and hygiene maintenance. Here are some examples:
- **Industrial Dishwashers** : Regulates the dosage of rinse aid or detergent, ensuring optimal cleaning of large quantities of dishes with professional dishwashers in restaurants, hotels and canteens.
- **Kitchen Utensil Cleaning Machines** : Ideal for the precise dosing of detergents or rinse aids in specialized machines for cleaning pots, cutlery and utensils used in large kitchens.
- **Automatic tray and container washing systems** : Used to dose rinse aid or detergent in machines that wash trays, glasses and containers in canteens or catering.
- **Automated cleaning systems in industrial kitchens** : It can be integrated into washing systems that clean surfaces or machinery inside professional kitchens, maintaining hygiene and food safety.
- **Food Equipment Washes** : Used in systems to clean equipment such as mixers, slicers, and kitchen machinery that require precise cleaning with detergents.
These applications demonstrate how the IPCR6/DET/4 pump can simplify and optimize the cleaning process, making catering management more efficient and ensuring a high level of hygiene.
