PROFESSIONAL DESCRIPTION

ICE MAKER in FULL CUBES with SPRAY SYSTEM, WITHOUT DEPOSIT, yield 165 kg / 24 hours :

- **FULL CUBE** : High density, crystalline and pure full cube. Suitable for prolonged cooling of any drink (without watering it down) in any situation of use.
- **HORIZONTAL EVAPORATOR, SPRAY SYSTEM** : The horizontal evaporator is made up of truncated cone-shaped copper bowls facing downwards. A pump sends pressurized water which, through nozzles, is sprayed onto the evaporator. Ice forms inside the bowls and is detached by heating them for a short time.
- **BACK STAGE** : Modular appliance to be used in combination with a large capacity store (container) to be installed generally in the back room (backstage): it is not seen but works hard producing ice continuously. Particularly suitable for restaurants, hotels, discos, fast foods. It represents a tireless producer that also satisfies seasonal and work peaks. Tropicalized model: it can be installed up to ambient temperatures of 43°C and using a water temperature of up to 32°C. Stainless steel body.
