PROFESSIONAL DESCRIPTION

DEPOSIT-FREE GRANULATED ICE MAKER, 600 kg yield / 24 hours :

- **built entirely of stainless steel ;**
- **Granular ice is formed using a vertical cylindrical evaporator** equipped with a screw conveyor that scrapes the ice from the internal surface and conveys it to an icebreaker, which releases it, reducing the residual water content. Granular ice, made available at a temperature just below 0°C, contains 25% residual water. This characteristic makes it ideal for many applications, from food display and presentation to cocktail creation, from use in the chemical and pharmaceutical industries to wellness centers.
