#### PROFESSIONAL DESCRIPTION

**GRANULAR ICE PRODUCER WITHOUT DEPOSIT, yield 600 kg / 24 hours :**

- **built entirely in stainless steel ;**
- the **formation of granular ice occurs through a vertical cylindrical evaporator** equipped with a screw that scrapes it from the internal surface and carries it towards an icebreaker, which releases it, lowering the quantity of residual water. Granular ice, made available at a temperature just below 0° C, contains 25% residual water. This characteristic makes it ideal for many applications, from the display and presentation of food to the creation of cocktails, from use in the chemical and pharmaceutical sectors to that in wellness centers.
