PROFESSIONAL DESCRIPTION

FLAT FLAKE ICE MAKER WITHOUT DEPOSIT, yield 600 kg / 24 hours, air cooling system :

- **Built entirely of stainless steel ;**
- **The formation of flat flake ice occurs through a vertical fixed cylinder evaporator** on whose surface water is made to flow which freezes instantly and, after being subcooled, is removed by a scraper. **The flat flake ice** , characterized by a **thickness of 1.5 mm** , **comes out at a temperature that varies from -5° C to -7° C** , which makes it very dry. This type of ice is therefore ideal for use in industrial processes, display and presentation of food, transport and conservation of food products.
