PROFESSIONAL DESCRIPTION

BLACK GLASS CERAMIC TABLETOP HOB, SPIDOGLASS Line, with 1 SELF-BALANCED LINED UPPER SHELF, version with DIGITAL CONTROLS :

- $\circ~$ high-strength stainless steel outer casing with rounded edges ;
- handle made of hygienic non-porous material with anatomical design for an optimal and safe grip ;
- ideal for cooking both sandwiches and rolls , as well as meat or vegetables , ensuring excellent cooking and maintaining intact flavours and aromas ;
- perfect for fast food , but can also be a valid support in the kitchen ;
- high cooking quality thanks to the uniform distribution of the heat produced and the use of glass-ceramic cooking surfaces, a material that
 offers high resistance to thermal shock, non-stick, non-porous and therefore impermeability to flavours and odours;
- cooking modes : contact and infrared cooking;
- $\circ~$ adjustable temperature from 0° to 350°C ;
- user-settable temperature unit in °C or °F;
- ultra-fast and uniform 'SHB' heating system, through which the heating filament reaches a temperature of 800°C, with emission of infrared rays;
- black glass-ceramic hobs, which allow some infrared rays to filter through, allowing them to reach and heat the product directly at the heart and ensuring crispiness of the external surfaces;
- smooth lower cooking surface and 1 self-balanced ribbed upper surface , with patented movement, to ensure a greater contact surface between food and glass-ceramic surface,
- hob dimensions : mm.250x250 ;
- glass ceramic is the perfect material for contact cooking , resistant to impacts and thermal shocks, impermeable to odors and flavors
 ;
- thanks to the non-stick characteristics of glass ceramic, cleaning operations are simple and quick , eliminating the risk of bad

smells due to food residues on the hobs;

- large capacity liquid collection drawer ;
- rounded cold temperature liquid drainage channels, which run all the way around the hob, allow dirt and liquids to be easily conveyed towards the collection drawer;
- side covers to prevent dirt from seeping in;
- master power switch;
- digital controls ;
- 4 adjustable cooking programs ;
- · cooking temperature settable by the user for each program;
- display of the time required to complete the set cooking program;
- display of the nominal and actual temperature of the hob;
- power indicator light with LED lighting ;
- maximum thermal efficiency and work safety (cold external surfaces without sharp edges);
- containment of heat loss through high-thickness fiberglass insulation;
- maintaining temperature with minimal energy consumption ;
- up to 60% savings in preheating time and up to 60% savings in energy consumption thanks to the high-efficiency Protek.Safe thermal
 insulation system, which eliminates unnecessary energy losses;
- compact and elegant design;
- non-slip feet.

VETROCERAMICA LA MIGLIORE SUPERFICIE PER CUCINARE

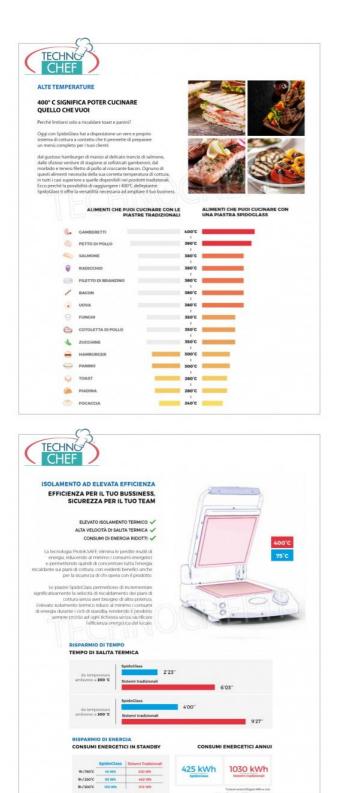

RESISTENZA 🗸

ASSENZA DI FUMO 🗸 FACILE PULIZIA 🗸

La vetroceramica è il materiale perfetto per le cottureper contatto. Resistente agli urti e agli shock termici, impermeabile ad odori e sapori, non assorbe il gusto dei cibi cotti e permette quindi di cucinare in sequenza cibi anche molto diversi tra loro mantenendo sapori e profumi intatti.

Grazie alle caratteristiche di antiaderenza del materiale vengono fortemente ridotti i fumi prodotti durante la cottura e le operazioni di pulizia sono semplici e rapide consentendo di eliminare il rischio di cattivi odori dovuti ai residui di cibo sui piani di cottura.
