

PROFESSIONAL DESCRIPTION

Round baking tray in aluminized steel , complete range with diameter from 20 to 32 cm.

NOTE: This product can be purchased in packs of 10.

RULES FOR USE AND MAINTENANCE OF TRAYS

IMPORTANT :

Regardless of the type of material, **all flat baking trays** should **never be baked empty** .

Aluminized sheet metal trays

They must be **kept oiled** , but since the sheet metal is treated and coated with aluminium, they have greater resistance to oxidation.

Before use, they should be placed in the oven at **150°C for half an hour** , in order to eliminate the protective industrial oil.

They can be used in leavening and freezing cells.

For cleaning, use a **soft, oiled cloth** . **Washing with water and caustic solutions is not recommended** .
