

PROFESSIONAL DESCRIPTION

POLYETHYLENE CUTTING BOARD with interchangeable colored layers, PROFBOARD series, FULL RANGE :

- **made of antibacterial polyethylene** which **inhibits the growth of bacteria and fungi** , reducing the formation of the biofilm, effectively addressing the problem of less frequent aggressive cleaning;
- **white polyethylene base 22 mm thick** ;
- **stainless steel feet** with **non-slip rubber ends** (approved for use with foodstuffs), guarantee an always stable support of the cutting board on the table;
- **stainless steel studs** for interlocking spare parts;
- **complete pack of 6 colored polypropylene cutting layers** ;
- the cutting conditions can support all common detergents and are also dishwasher safe, they do not absorb and release flavors and odors;
- designed for professionals who must use a cutting board for each type of food to be cut;
- according to the law, their use is allowed for the processing of food products.

Accessories / Optional :

- spare cutting layer, available in different colors: **RED** (raw meats), **BLACK** (raw vegetables), **YELLOW** (cooked meats and poultry), **GREEN** (salad and fruit), **BLUE** (fish), **WHITE** (bread and cheeses).
