## REFRIGERATED WINE CELLAR, Multi-Temperature, Static Refrigeration, capacity 260 Bordeaux bottles, Class A :

### Personalization

- **the wine cooler can be configured with multiple combinations of colors and frames by choosing the preferred combination of two colors for the structure** (black and ivory) **and four door frames** (silver, black, light and dark).

### Interior fittings

- **STANDARD : Elegant black metal shelves that allow you to stack the bottles in order to reach the maximum values in terms of capacity.**
- 
- **The wine cellar can be customized with different internal layouts** , to be ordered separately ( **Optional** ):
  - **PULL-OUT DRAWERS** : the **drawers slide on guides** that offer **maximum fluidity** and a **cushioned end stop** . Specific drawer brackets are required to ensure this level of performance and reliability. **The wooden front of the drawer is coordinated with the color of the external frame of the structure** and has a seat designed for labeling the bottles.
- 

### Energy saving

- **maximum reduction of dispersion from inside to outside and vice versa ;**
- first wine cellar to comply with the new EU legislation
- **exceptional insulation with considerable savings in operating consumption** (60% savings compared to the previous lines)

### Maximum silence

- **4 operating modes** : **Normal** , **Booster** (up to -2° with respect to the set setting), **Silence** (- 4 db) and **Economy** (preservation of the temperature up to 12 hours of stand-by out of service)

### ethical commitment

- For the shell, recycled and **recyclable plastic materials are used** , for the **insulating materials low-impact polyurethane foams** , made with CFC-free blowing agents. The refrigerant used is R290 (propane), a “naturally” green refrigerant gas.

### Design

- New smart, young and modern design.

### Space conquest

- **Flexibility and functionality of the exhibition spaces**

### Custom temperatures

- Always precise, constant and adjustable.

### Static refrigeration version ( multi-temperature )

- **Thanks to the skilful management of cold air flows, by modulating the natural stratification of temperatures, the compartment is divided into several sectors at different temperature levels .**

### Digital temperature control

- **Adjustable temperature from +2° to 10°C or from +12° to +20°C**

### Door with double glazing and lock

- **Double glazing made from double glazing and a large 14mm thick internal chamber .**
- **External and internal glass both TEMPERED .**
- **Internal glass made with the innovative magnetron system** (very thin layer of metal oxide) to improve thermal insulation.
- **Internal glass made with low emissivity** (insulating treatment) to improve thermal insulation and to avoid the formation of humidity.
- Thermal insulation of the internal glass with extremely low Ug thermal transmittance value.
- Channel on the chamber made with enhanced performance to favor thermal break.

### **Technical data :**

- Capacity (in Bordeaux bottles): 260 bottles (without internal accessories)
- Capacity lt.536
- Energy Saving: Class A, only with glass door
- Multi-Temperature: +2°/+10°C (SET +2) ~ +12°/+20°C (SET +12)
- Interior LED lighting
- Type Gas R290: is a natural, highly efficient refrigerant fluid (up to 15% more efficient than R134a), designed for high performance and long life, has an Ozone depletion potential equal to ZERO and a low GWP value (3 GWP ) .
- Control panel: Multi touch display
- Static refrigeration
- Environmental Operating Conditions: TA 30°C - 55% RH (Clim. Class 4)
- Emission Level: 38 db (A)

### **Variants :**

1. **Structure color** : Black, ivory
2. **Frame Color** : Black, Silver, Dark Wood, Light Wood

### **Accessories/Options :**

- Shelf (additional) complete with 4 spacers, max capacity 65 Bordeaux bottles
- Removable drawer

### Versione a refrigerazione statica (multi-temperatura)

Grazie alla sapiente gestione dei flussi di aria fredda, modulando la stratificazione naturale delle temperature, si ottiene una suddivisione del vano in più settori a differenti livelli di temperatura.
