PROFESSIONAL DESCRIPTION

ALUMINUM PIZZA PEEL BY THE METER, BLUE Line, light, flexible and resistant, complete range :

- **Anodized aluminum peel for pizza by the metre** , a particular type of maxi size pizza. The pizza can be impaled directly with the tool or the dough and filling can be spread directly on the peel.
- For this you need a **robust tool** which facilitates the sliding of the dough on the refractory stone of the oven and which is at the same time **light and easy to handle** .
- The dimensions of the peel also require, in the action of putting it into the oven, that the peel is supported by the help of the hand. Gi.Metal's proposal for pizza by the meter is to replace wood, commonly used for this type of peel , in favor of a **light, solid, durable and certainly more hygienic material such as anodized aluminum** .
- **The neutral anodization makes the surface of the blade uniform, protecting it from oxidation, as well as guaranteeing its incomparable lightness** .
