Services and Technologies for professional catering since 1973

PROFESSIONAL DESCRIPTION

Gastro-norm non-stick baking sheet with 6 round molds 12.5 cm diameter, for muffins, size 53x32.5 cm.

USE AND MAINTENANCE OF THE TRAYS

IMPORTANT :

Regardless of the type of material, all flat pans should **never be baked empty** .

NON-STICK TRAYS

Use the air jet or soft nylon brushes for **cleaning** . **Do not scratch the casing** with metal tools or abrasive brushes as the incisions may cause permeation and corrosion.

Do not put the empty molds in the oven at temperatures above 200 ° C. This temperature represents the thermal resistance limit of the resin. Furthermore, at this temperature the coating softens considerably, leading to a rapid decay of the non-stick properties.

Do not wash the trays with high-pressure pulvapor and do not use caustic solutions.

Use soft damp cloths for cleaning.
