| FM-PFD27N | Tabletop INDUCTION HOB, INDUCTIVE SURFACE: diameter from 140 to 220 mm, V. 230/1, Kw 2.7, Weight 5 Kg, dim. mm. 325x370x105h | Delivery from 4 to 9 days |

PROFESSIONAL DESCRIPTION

Tabletop INDUCTION PLATE, FIMAR brand:

- **stainless steel structure** ;
- **glass ceramic plate** ;
- **inductive surface** : diameter from 140 to 220 mm ;
- **heat induction system from the plate to the container** ;
- with the removal of the container, which must absolutely be of the metal type, the machine stops;
- **power output** : from 0.8 to 2.7 kW;
- operation in power level mode or temperature mode (C°).

THE ADVANTAGES OF INDUCTION :

- **very short preheating times** and **shorter cooking time** than other methods;
- **high precision** and **promptness of adjustment** ;
- **the heat produced is completely transferred to the food** to be cooked **without any type of dispersion** .

COOKING :

- the induction plate works by creating an **induced electromagnetic field in the container which, when heated, cooks the food** inside it.

CLEANING :

- the **lower temperature of the hob** makes **cleaning easier** , as food residues do not burn and therefore do not cake.

CE mark
