

PROFESSIONAL DESCRIPTION

THERMAL BAG with INDEPENDENT HEATING, for the transport of 3 PIZZAS of 46 cm :

- designed to **contain large pizzas** (46 cm);
- can **contain up to 3 pizzas** (containers h.2.5 cm);
- the **system** is composed of an **INDUCTION CHARGING STATION** (Mod.CHCT-XLPTDS200), a **THERMAL STORAGE DISC** (Mod.CHCT-PFPD001), and an **INSULATED BAG for maintaining heat** (Mod.CHCT-XLVD001);
- the **Thermal Disc** is **housed in a hidden compartment inside the thermal bag** and must be removed only in case of replacement;
- the **bag complete with disc positioned on the induction charging station automatically activates heat transmission** ;
- a **red light** indicates that charging is in progress, the **light turns green** when the **bag is at temperature** and ready for use,
- simple, **wireless rechargeable** and reliable;
- bag and disc are sold separately;
- **initial charge in 2.5 minutes** ;
- **subsequent recharge in 60 seconds** ;
- **keeps pizzas hot for a 45 minute delivery time** ;
- the transport system (disc + thermal bag) weighs 1.8 kg;
- the charging station does not heat externally;
- the **charging station performs self-diagnostic functions** and warns the user in case of errors;
- easy to operate, membrane panel and bright displays are easy to understand and use;
- the charging station is designed to **operate on a standard worktop or 'drop-in'** for bespoke shelving;
- the charging station is **designed to resist flour, dust, oil, grease and various other food substances** found in kitchens.
