Services and Technologies for professional catering since 1973

PROFESSIONAL DESCRIPTION

Round oven tray in aluminized steel, complete range with diameter from 20 to 32 cm.

NOTE: This Product can be purchased in packs of 10 pieces.

USE AND MAINTENANCE OF THE TRAYS

IMPORTANT :

Regardless of the type of material, **all flat pans** should **never be baked empty** .

Pans in aluminized sheet

They must be **kept oiled** , but since the sheet is treated and coated with aluminum, they have a greater resistance to oxidation.

Before use, they must be placed in the oven at **150 ° C for half an hour** , so as to eliminate the industrial protective oil.

They can be used in a leavening and freezing cell.

Use a **soft oiled cloth for cleaning** . **Washing with water and caustic solutions is not recommended** .
